## **Living Conditions among Palestinian refugees in camps in Lebanon**

The project aims at mapping living conditions among Palestinian refugees living in camps in Lebanon or in areas locally called "gatherings". The Palestinian Authority wanted such information in order to obtain a more complete picture of the conditions under which the refugees are living in the various host countries in the Middle East. The Palestinian Central Bureau of Statistics (PCBS) in Damascus was Fafo's partner on the project and conducted the interviews in the field.

The project was financed by the Norwegian Ministry of Foreign Affairs. The MFA was interested in the study as Norway provides substantial support to the Palestinian refugees in Lebanon both through the UN organization UNRWA and through non-governmental organizations in the country.

The study is based on data from interviews with 3,620 households, which cover 19,200 persons. The sample was constructed to be representative for all the camps in Jordan as well as for the clusters of Palestinian refugee families living in "gatherings". The interviews were conducted in January and February 1999.

Married w/ child & other	76.3	23.7	100	1,689	1,687

\* Information on household incomes is missing from one or more income source for 6% of the households. Among those missing, the overall majority does simply not know their income, while a few households refuse to tell. Further analysis of the missing households, demonstrate a slight regional tilt. It is highest in Beirut (11%) and lowest in the Bequa'a (3%). At the same time 63% of the missing households report their total income, regardless of source. Comparing non-missing households to missing ones reveals that non-reporting is twice as high among the lowest incomes as for the highest ones (Average total annual income is 5.476.000 among non-missing as compared to 4.243.000 for missing ones). The following analysis relies only on households with complete income source reporting, and thus inflates slightly the income level.
