Quick Start Overview

Quick Start Overview

Written by Emily Ferguson

Updated over a week ago

Here's how to quickly get started with a **new form**, deploy it as a **survey project**, and **start collecting data** in the field.

Sign up and the first login

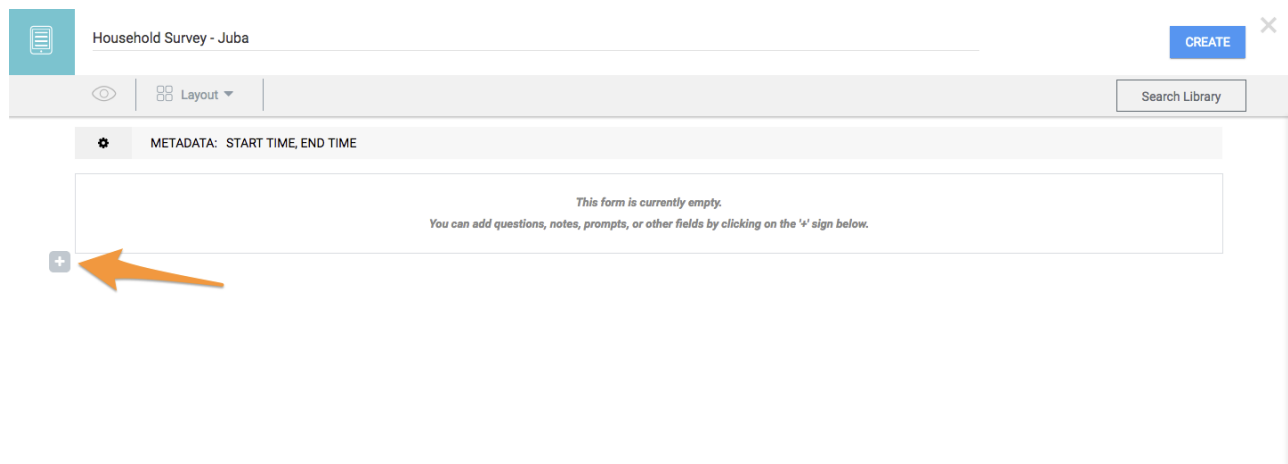

Visit <https://kf.kobotoolbox.org> to create a new account. If you work for a humanitarian organization, please sign up at <https://kobo.humanitarianresponse.info> instead. After activating your account through the emailed link, you can log in to access your account.

Create your first form

1. Create your first form by clicking on New, then choose New Form.

2. Click on the + button to add your first question.

3. After typing in the question label, click Add Question and choose a response type

What is your name?

Select one	Select many	abc Text	123 Integer
1.0 Decimal	Date	Time	Date + time
GPS Location	Upload photo	Record audio	Record video
Read a note	Scan barcode	Acknowledge	1+1 Calculate value

4. You can give your form a name by changing the default 'New form' text on top.

5. To add skip logic to a question, click on a questions settings and go to the Skip Logic section.

123 How many children do you have?

Settings

- Question Options
- Skip Logic**
- Validation Criteria

This question will only be displayed if the following conditions apply

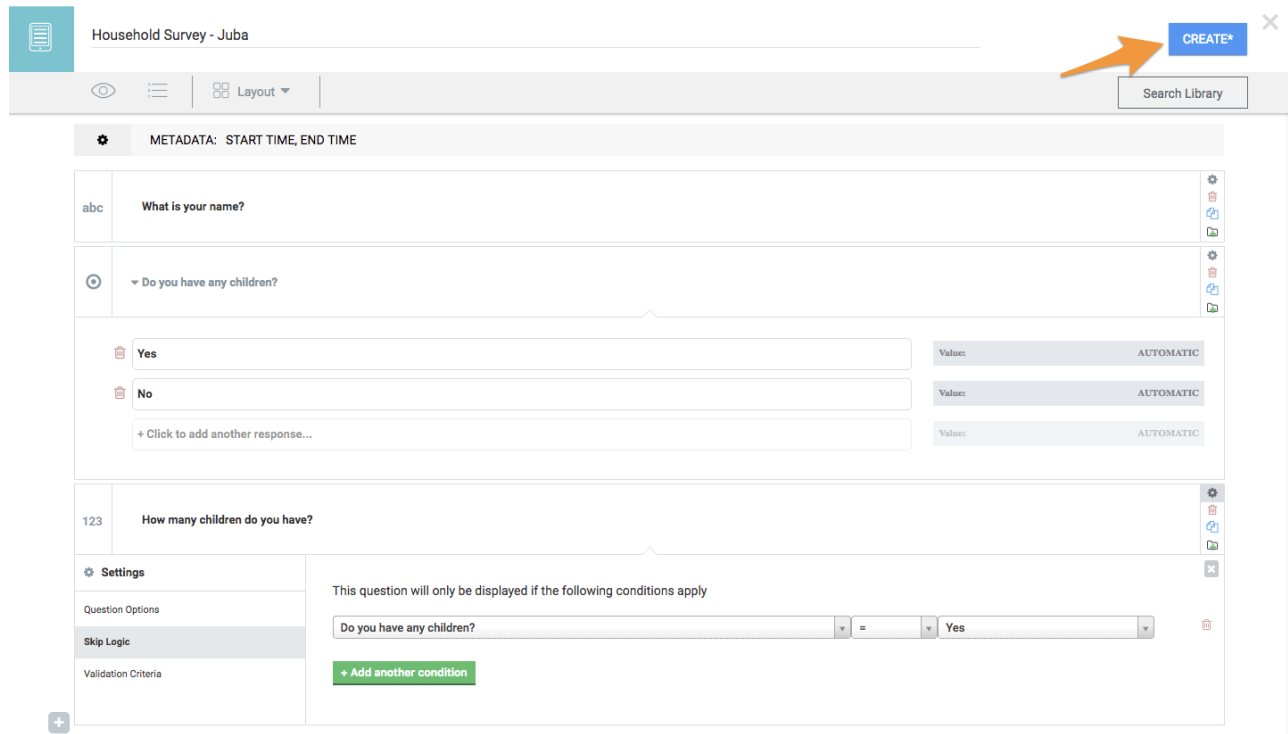

Do you have any children? = Yes

+ Add a condition

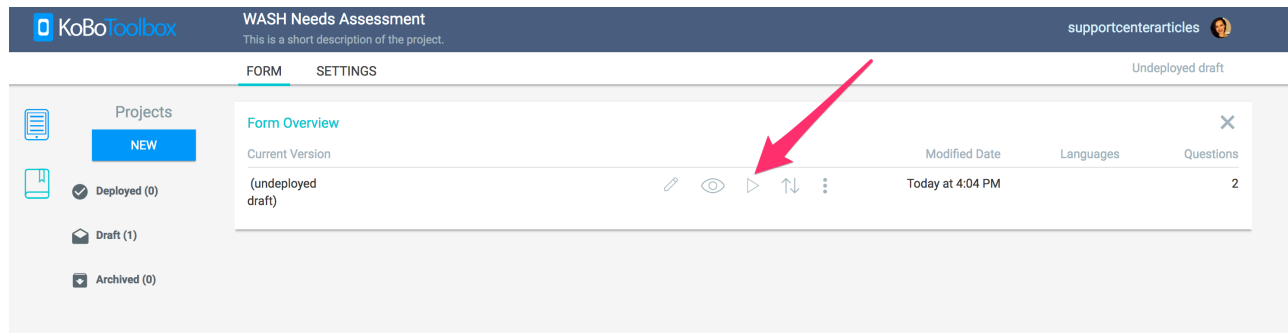

(See [here](#) for an overview of all formbuilder functions.)

6. Click Preview Form to quickly view your questions and test skip logic.

7. To save the form click the Create/Save button, then 'X' to close the form.

8. To start collecting data you need to first **[deploy your draft form as a new data collection project](#)**.

9. You're ready to collect data! You can enter data in the browser on any device (computer, iPhone, Android) or use our Android application KoBoCollect.
