

GENDER INTERVENTIONS IN LEBANON: BETWEEN DUPLICATED EFFORTS AND PERSISTENT GAPS

This infographic provides an overview of gender actors and interventions in Lebanon*, and aims to highlight gaps and duplications in the sector. This visual shows that while beneficiaries are diverse, some groups remain less targeted such as trans*, policy makers, and persons living with mental health disabilities. At the same time, other categories appear as over-targeted and represented, notably the CSO sector, migrants, displaced individuals and refugees. The visual also shows that some areas of focus have been overlooked by actors (e.g. education, medical care, LGBTQI+), in comparison to others such as women's rights, and gender-based violence. Finally, while interventions are spread across the territory, gender interventions are still scarce in the peripheries of the territory.

Sources
 Data is based on the Mapping of Gender Actors in Lebanon, based on a survey undertaken by 75 gender actors in August and September, 2020. Visit the mapping here: <https://civilsociety-centre.org/map/gen/gender-actor>. This mapping and infographic were developed in partnership with Diakonia.
