A.1 TITLE

Baseline Survey for the Lebanon Small Ruminant Dairy Value Chain

A.2 BACKGROUND

The Lebanon Agriculture and Rural Empowerment (ARE) Activity is a multi-year project funded by USAID Lebanon and implemented by Chemonics International.

The purpose of ARE is to equip the agribusiness sector and rural communities with the technical and financial resources to generate increased productivity, sales and exports, improving producer income. To support this objective, ARE will increase jobs; improve incomes; improve female participation and employment opportunities; increase domestic and export sales; increase private sector investment; improve access to finance; link value chain actors to domestic and international markets; and improve farm production through improved practices, technology, increased volume, and/or decreased cost. Specifically, ARE intends to achieve the following three objectives:

1. Increased Domestic and Export Sales;
2. Increase Access to Financial Resources; and
3. Improve the Productivity of Micro, Small, and Medium Enterprises (MSMEs)

ARE will utilize a facilitative approach, based on the theory of market system development, to incentive value chain stakeholders in prioritized value chains and sub-sectors to take advantage of new and emerging opportunities to increase their potential to grow sales both internationally and domestically. Key to this approach will be the identification of “Champion Firms” that will serve as focal point from which ARE intends to address identified leverage opportunities within supported VCs. Partnerships with Champion Firms will result from a co-creation process between ARE and the respective firm that will define the Partnership Framework Agreement (PFA) and ultimately guide implementation of the joint interventions aiming to unlock opportunity and create the underpinnings for new growth at both the firm and sub-sector / VC level.

A.3 OBJECTIVE

The objectives of the baseline survey

- To highlight the impact of ARE partnerships with herders/producers’ collectors and firms and compare against a wider range of businesses within the Small Ruminant Dairy Value Chain
- To capture development opportunities and/or identify emerging new constraints within certain value chains
- To help inform ARE programming and adapt interventions where needed

A.4 STATEMENT OF WORK

To measure success in reaching the aforementioned objectives, ARE will utilize the following tools:

- Business profile data collection form

- Farmer/firm surveys

While the business profile data collection form will act as a tool to measure business specific outcomes and impact, the farmer/firm surveys will act as a monitoring tool to help measure impact at the value chain level and will serve as a counterfactual/hypothetical reference that guides the overall analysis for the activity's baseline and end-line reporting.

Criteria that the program will track:

- New jobs created
- Increase in generated income of value chain actors
- Change in sales values
- Change in production cost
- Change in production volume
- Private sector investments made within the value chain
- Access to financing
- Use of improved technologies or management practices
- Introduction of extension services
- Female role in the value chain
- Market linkages available

Areas where surveys are expected to be conducted:

- North Lebanon
- Bekaa
- Beirut and Mount Lebanon
- South Lebanon

The selected firm shall be responsible for the following tasks for each survey requested by ARE:

- Review and finalize the proposed questionnaire provided by the ARE MEL team and technical staff. Proposed relevant adjustments to questions with supporting justification.
- Identify a statistically representative sample size to conduct surveys within the specified value chain (small ruminant dairy sector) – survey should target both farmers/herders as well as processors (firms, cooperatives, other).
- Mobilize, contract, and train field researchers on the survey tools and methodologies.
- Conduct the revised and approved surveys.
- Utilize Computer Assisted Personal Interviewing (CAPI) via Open Data Kit (ODK) or other relevant software platform to conduct interviews.
- Draft Survey Results and review with ARE management.
- Present results of the survey to ARE senior management team.
- Conduct discussions, as needed, solicit input and recommendations from stakeholders to be included in the final analysis report.
- Submit a comprehensive report that details the:
 - Study design,
 - Methodology,

- Implementation,
- Results and analysis,
- Discussion of major findings and recommendations based on input from all stakeholders which will include ARE technical staff, farmers and firms as needed.
- Challenges

Pursuant to the requirements of FAR 52.204-10, Chemonics is required to report information regarding its award of subcontracts and sub-task orders under indefinite delivery/indefinite quantity subcontracts to the Federal Funding Accountability and Transparency Act Subaward Reporting System (FSRS). This information will be made publicly available at <http://www.USASpending.gov>.

(b) Subcontractor's Responsibility to Report Identifying Data.

In addition to contractual remedies, Chemonics may make the Subcontractor's failure to comply with the reporting requirements a part of the Subcontractor's performance information record.
