

**REQUEST FOR QUOTATION (RFQ): No. RFQ/2022/ZAH/008
 PROVISION OF METAL GARBAGE BINS (1,200 LITERS CAPACITY)**

UNHCR, with its Offices in Lebanon located in Beirut, Mt. Lebanon, Tyre, Tripoli, Qobayat and Zahle, invites qualified and experienced vendors (suppliers and authorized dealers) to submit their offers for the supply, delivery of Metal Garbage Bins (1,200 Liters Capacity) to the UNHCR Office in Zahle, Lebanon. The selected supplier will be awarded a UNHCR Purchase Order (PO) specifically targeting the supply and delivery of a quantity of 100 Metal Garbage Bins (1,200 Liters capacity) as per the following specifications:

Specifications for Metal Garbage Bins (1,200 Liters capacity):

#	Description
1	All the bin is made of 2.5mm hot dip galvanized metal sheets. Pressed and continuously welded to each other to ensure rigidity and longevity of the bin.
2	The bottom of the bin is pressed in a 3D form to assure more rigidity and equipped with drain stopper to release any accumulated liquids inside the bin.
3	Steel support (U shape) for the wheel, all the corners of the bin are pressed mechanically to ensure rigidity in order to resist damage that could be caused by handling during waste collection.
4	Heavy duty Bin lifting point, with steel cylinder with minimum of 5cm diameter, with the required (U shape) support, from both sides of the bin.
5	Paint (2 layers: first layer of anti-rust paint, second layer of green paint)
6	Heavy duty 4 * 360 Degrees rotating rubber wheels (200mm diameter) with steel coaster. Two with brake paddle. Each of the wheels can hold 1/3 of the weight of the filled bin, approximately 160 Kg each. Wheels must be branded.
7	UNHCR Logo is painted from three sides.

Kindly make sure the following to be part of your technical offer:

- All items/Parts must be able to withstand the heavy duties nature of works
- Quotations referencing catalogue numbers will be accepted if the catalogue is included in the bid package
- Photos are also welcomed, (signed and stamped)
- Brand names and country of origin should be indicated in the technical datasheets
- If selected, UNHCR will ask for a prototype/sample of the item before awarding the contract.
