

Technical Specifications for PVC coated Sheets for Shelters:

- Materials: PVC coated sheet, white color.
- 440 grams per square meter, 9 horizontals and 9 vertical reinforcements per inch square meter, 1000 x 1000 wires per square inch.
- Dimensions of one single unit is 8 x 8 meters.
- Tensile strength: minimum 600 N both directions of warp and weft
- Tear strength: under ISO 4674 (A2).
- UV resistance: under ASTM G53/94 (UVB 313 nm peak).
- Reinforcement aluminum eyelets: provided with 20mm diameter and placed every 50cm on four sheet sides of the single sheets.
- Tensile strength of the eyelets: minimum 700N inside the eyelets as per ISO 1421
- Welding: under ISO 1421 plus additional procedure.

Requested Quantity:

1,550 units as per above specifications.

Delivery Leadtime:

Shorter delivery lead time from Purchase Order date will be given higher consideration.

Delivery Term and Location:

DAP (Delivery At Place) UNHCR warehouse located in Zouk Mosbeh area.

Warranty Service:

Offer should include one year of warranty service starting from delivery date covering any manufacturing defects.
