- activities related to obtaining permits and works supervision of works will take not more than 50 days from the start of works until their full implementation.

The assignment will end once the works have been completed. The Expert shall make every effort to ensure that the works are completed before 30th August 2021

SELECTION AND AWARD CRITERIA

16. Selection criteria

The following selection criteria will be applied to the tenderers. In the case of tenders submitted by a consortium, these selection criteria will be applied to the consortium as a whole. If not specified otherwise. The selection criteria will not be applied to natural persons and single-member companies when they are sub-contractors.

1) Economic and financial capacity of the tenderer (based on item 3 of the tender form)

The Tenderer will not be economically dependent on the Contracting Authority in the event that the contract is awarded to it; and should have sufficient financial stability to handle the proposed contract.

The reference period which will be taken into account will be the last three years for which accounts have been closed.

- The average annual turnover of the tenderer of the years 2018, 2019 and 2020 must exceed 20 000 EUR (twenty thousand EUR).

2) Professional capacity of the tenderer

The reference period which will be taken into account will be the last 5 years from submission deadline. Criteria for legal and natural persons:

- At least one staff currently work for the tenderer in fields related to this contract; and
- Has a professional certificate appropriate to this contract, such as higher education degree (Masters level) in Engineering or postgraduate degree in Traffic Engineering;
- Proficiency in English and Arabic.

3) Technical capacity of candidate (based on item 4 and 5 of the tender form)

The reference period which will be taken into account will be the last five years from submission deadline. Criteria for legal and natural persons:

- The tenderer has provided services under at least three contracts with a budget at least 20 000 EUR in Traffic Engineering services, which were implemented at any moment during the following period: five years.

This means that the project the tenderer refers to could have been started or completed at any time during the indicated period but it does not necessarily have to be started and completed during that period, nor implemented during the entire period.

Candidates/tenderers are allowed to refer either to projects completed within the reference period (although started earlier) or to projects not yet completed. In the first case the project will be considered in its whole if proper evidence of performance is provided (statement or certificate from the entity which awarded the contract, proof of final payment for services). In case of projects still on-going only the portion satisfactorily completed during the reference period although started earlier will be taken into consideration. This portion will have to be supported by documentary evidence (similarly to projects completed) also detailing its value. If a tenderer has implemented the project in a consortium, the percentage that the tenderer has successfully completed must be clear from the documentary evidence, together with a description of the nature of the services provided if the selection criteria relating to the pertinence of the experience have been used. The above mentioned documentary evidences must be made available to the Contracting Authority upon request.

Previous experience which would have led to breach of contract and termination by a Contracting Authority shall not be used as reference.

Failure to comply with the above mentioned selection criteria will lead to rejection of the tender.

The requirements of the Term of Reference are leading.

An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links which it has with them. It must in that case prove to the contracting authority that it will have at its disposal the resources necessary for the performance of the contract by producing a commitment by those entities to place those resources at its disposal. Such entities, for instance the parent company of the economic operator, must respect the same rules of eligibility - notably that of nationality - and must comply with the selection criteria for which the economic operator relies on them. Furthermore, the data for this third entity for the relevant selection criterion should be included in the tender in a separate document. Proof of the capacity will also have to be provided when requested by the contracting authority. With regard to technical and professional criteria, an economic operator may only rely on the capacities of other entities where the latter will perform the services for which these capacities are required. With regard to economic and financial criteria the entities upon whose capacity the tenderer relies become jointly and severally liable for the performance of the contract.

17. Award criteria

Best price-quality ratio.
