

PRCSMADAD 02 – Clarifications

Clarifications related to the Technical specifications

- Each first aid kit produced and delivered under the Contract must have a unique production serial number placed on the inside or outside of the kit.
- We received a question about the item “Adhesive Plaster”. It can also be described as a simple band aid.
- We received a question about the item “Transparent dressing”. With this we refer to the kind of vaseline gauze that is used to cover burned areas of a body.
- We received a question about the items “Elastic crepe bandage” and whether it has to be crepe or if a simpler elastic bandage is acceptable. The answer is that the bandage has to be crepe, and a simpler elastic bandage is not acceptable.
- For the sample kits that are to be delivered with the tenders the logos mentioned in the technical specifications are not required. The logos will be shared with the supplier that is awarded the Contract. The logos are listed below for your reference:

Other clarifications

- We received proposals for alternative payment frequency under the Contract. No alternative solutions will be considered.
- We received proposals related to the delivery frequency. No alternative solutions will be considered.
- We received a request to clarify the technical requirements set out in the Contract notice. This means that tenderers should ideally have delivered two contracts with a budget of 150 000 EUR in the last five years.
