EVALUATION CRITERIA

TECHNICAL QUOTATION EVALUATION (100 Points):

Quotations will be evaluated according to the criteria stated herein. The relative importance of each individual criterion is indicated by the number of points assigned thereto. A total of 100 points is the maximum possible technical score for each quotation. The evaluation criteria serve to: (a) identify the significant factors which the Offeror should address in their quotation under each section and (b) set the standard against which all quotations will be evaluated.

Management, Key Personnel, and Staffing Plan (50 Points):

Clarity and effectiveness of the organizational and staffing plan, demonstrating the necessary mix of skills and experience.

Corporate Capabilities, Experience, and Past Performance (50 Points)

A minimum of five (5) years of proven track record in implementing similar activities to those outlined in the scope of work. Name and experience for each stakeholder shall be provided.

COST QUOTATION EVALUATION:

Evaluation scores are not assigned for cost. The review of the cost quotation shall include cost realism. This process will include a review of the cost portion of the Offeror's quotation to determine if the overall costs proposed are reasonable and realistic for the work to be performed, if the cost reflects that the Offeror understands the requirements, and if the costs are consistent with the technical part of the quotation. Cost quotations providing more direct funding towards the program instead of administrative costs will be reviewed favorably in the best value determination.

Evaluation of cost quotations will consider, but not be limited to, the following:

- Cost realism and completeness of cost quotation and supporting documentation.
- Overall cost control evidenced in the quotation such as avoidance of excessive salaries, competitive procurement of subcontracts, excessive cost of management oversight and other costs in excess of reasonable requirements.
- Amount of proposed fee, if any.
