

REQUEST FOR QUOTATION

Fair Trade Lebanon

compost

Purpose:

This intervention's objective is to mitigate the adverse effects of rising food costs and decreased purchasing power on rural Lebanese livelihoods by

- a. Decreasing monthly expenditures by supporting Lebanese families with seeds, seedlings and compost that can provide nutritious, healthy food and;
- b. Improving farmer yields and income through training and sales of their crops to the local market

Fair Trade Lebanon is looking for compost suppliers to distribute the compost to open-field farmers and greenhouse farmers whose soils are in poor condition.

The supplier must have the following

- The compost unit must be located within 40km of the South (Saida)
- The supplier must have a valid permit from all relevant ministries.
- Be able to provide test results from a certified LAB for the compost with the following indicators:
 - Organic matter
 - Nutrients
 - Microorganisms:
 - Moisture content:
 - Nitrogen
 - Potassium
 - Phosphorus
 - Carbon
 - Magnesium
 - C/N ration
 - Organic matter
 - Humidity
 - P.H
 - Country of origin
 - Appearance
 - Pathogens: Compost should be free of pathogens and weed seeds.
 - Toxicity: Compost should be free of any toxic materials or chemicals that could be harmful to plants or animals.
 -
