

**One Year Agreement TOR for Mobility assistive devices, prosthesis and orthosis.**

**REF: BAD 71-2024**

	Condition	Description	Size	Availability of the Quantity in stock	Price
1	Partial Foot Amputation	Lower limb Prosthetics/ Partial Foot Prosthesis/ Molded Socket/ Toe Filler			
2	Chopart Amputation	Lower limb prosthetics/ Partial Foot Prosthesis/Tarsal/Pirogoff or Chopart/ Molded plastic socket/ Foot Compensation			
3	Syme Amputation	Lower limb prosthetics/Ankle/Symes/PTB brim design socket and soft insert /Sach foot or Single axis foot			
4	Transfemoral Amputation	Lower limb Prosthetics/Below Knee/ Molded PTB or Supracondylar suspension molded Plastic Socket/ Socket insert/ Cuff Suspension/ Endoskeletal System/ Sach foot/soft Cover and finishing			
		Lower limb Prosthetics/Below Knee/ Molded PTB or Supracondylar suspension molded Plastic Socket/ Socket insert/ Cuff Suspension/ Endoskeletal System/Single Axis foot/soft Cover and finishing			
5	Knee Disarticulation	Lower limb prosthetics/Knee Disarticulation/Molded Plastic socket/Polycentric knee joints/Endoskeletal system/Sach foot or Single axis foot/ Soft cover and finishing			
6	Transfemoral Amputation	Lower limb prosthetics/Above knee/Molded Socket/Single axis (constant friction, manual lock, or safety knee/ Endoskeletal system/Sach foot/Soft Cover and Finishing			
		Lower limb prosthetics/Above knee/Molded Socket/Single axis (constant friction, manual lock, or safety knee/ Endoskeletal system/Single Axis foot/Soft Cover and Finishing			
7	Hip Disarticulation	Lower limb prosthetics/Hip disarticulation/molded socket/hip joint/endoskeletal system/Single axis constant friction knee/Sach foot/Soft Cover and finishing			
8	Legg Perthes Disease	Lower limb orthotics/Legg Perthes Orthosis/ trilateral Socket orthosis/ including the shoe/custom fabricated			
9	Upper Limb Amputation	Partial hand prosthesis			
		Transradial prosthesis			
		Transhumeral prosthesis			
		Shoulder disarticulation prosthesis			
10	Club foot Cerebral Palsy, Developmental Disease, Peripheral Nerve Injury, Lower Limb Discrepancy, Lower Limb Deformity, Poliomyelitis, Spinal Cord Injury, Spina Bifida, Diabetic foot Ulcer Others	Lower limb orthotics/ ankle foot Orthosis/ Plastic solid ankle AFO/High temperature thermoformable material molded to patient model /Adult			
		Lower limb orthotics/ ankle foot Orthosis/ Plastic solid ankle AFO or SMO /High temperature thermoformable material molded to patient model / Child			
		Lower limb orthotics/ ankle foot Orthosis/ Plastic solid ankle AFO/ Rigid anterior tibial section/ High temperature thermoformable material molded to patient model/ Adult - GRAFO			
		Lower limb orthotics/ ankle foot Orthosis/ Plastic solid ankle AFO/ Rigid anterior tibial section/ High temperature thermoformable material molded to patient model/ Child - GRAFO			
		Lower limb orthotics/Ankle foot Orthosis/Articulated plastic AFO/ Flexible or metal ankle joints/ high temperature thermoformable material molded to patient model			
		Lower limb orthotics/Orthopedic foot wear/Custom fitted shoe/ with internal and external shoe modification/ Infant or Adult			
		Lower limb orthotics/Orthopedic foot wear/Diabetic shoe/custom fitted / modification			
		Lower limb orthotics/Knee-Ankle-Foot Orthosis/ Solid Ankle/ Solid Knee/Plastic KAFO/ Molded to patient model			
11	scoliosis	Lower limb orthotics/ foot/ shoe insert / removable/double density flexible foam/each/ custom fabricated			
12	ACTIVE / MOTIVATION WHEELCHAIR	Lower limb Orthotics/ Dennis Brawn Orthosis			
13	ACTIVE / MOTIVATION WHEELCHAIR	Lower limb orthotics/ hip orthosis / Abduction control of hip joints/ Harness / Fabric / custom fitted			
14	ACTIVE / MOTIVATION WHEELCHAIR	Corset for spinal deformities			
15	ACTIVE / MOTIVATION WHEELCHAIR	ACTIVE / MOTIVATION WHEELCHAIR with characteristics :Light, small and Removable armrests. Backrest below shoulder level, small handles (back), low center of gravity. One-piece, height adjustable footrests	35CM		
16	ACTIVE / MOTIVATION WHEELCHAIR	ACTIVE / MOTIVATION WHEELCHAIR with characteristics :Light, small and Removable armrests. Backrest below shoulder level, small handles (back), low center of gravity. One-piece, height adjustable footrests	40cm		
17	ACTIVE / MOTIVATION WHEELCHAIR	ACTIVE / MOTIVATION WHEELCHAIR with characteristics :Light, small and Removable armrests. Backrest below shoulder level, small handles (back), low center of gravity. One-piece, height adjustable footrests	45CM		
18	ACTIVE / MOTIVATION WHEELCHAIR	ACTIVE / MOTIVATION WHEELCHAIR with characteristics :Light, small and Removable armrests. Backrest below shoulder level, small handles (back), low center of gravity. One-piece, height adjustable footrests	50CM		
19	Axillary crutches	Adult Adult XL from 150-170cm Height to be calculated from foot to underarm support Height adjustable with butterfly screws. Hand grip height adjustable Dense foam for hand grip and underarm support. If possible with ergonomic hand grip. In aluminum. If possible, rubber tips with metal inlay for longer resistance	X-large		
20	Axillary crutches	Adult medium from 110-130cm Height to be calculated from foot to underarm support Height adjustable with butterfly screws. Hand grip height adjustable Dense foam for hand grip and underarm support. If possible with ergonomic hand grip. In aluminum. If possible, rubber tips with metal inlay for longer resistance	Medium		

18	Axillary crutches	<p>Adult large from 130-150cm  Height to be calculated from foot to underarm support  Height adjustable with butterfly screws.  Hand grip height adjustable Dense foam for hand grip and underarm support.  If possible with ergonomic hand grip.  In aluminum.  If possible, rubber tips with metal inlay for longer resistance</p>	Large		
19	Axillary crutches	<p>Small From 90cm-110cm  Adult large from 130-150cm  Height to be calculated from foot to underarm support  Height adjustable with butterfly screws.  Hand grip height adjustable Dense foam for hand grip and underarm support.  If possible with ergonomic hand grip.  In aluminum.  If possible, rubber tips with metal inlay for longer resistance</p>	SMALL		
20	Baby Walker Yoopala				
21	Baby Walker Yoopala	CP			
22	Backward walker	<p>Adjustable  With two ergonomic handles  4 wheels</p>	Child		
23	Backward walker	<p>Adjustable  With two ergonomic handles  4 wheels</p>	Adult		
24	Cane	Cane with 4 feet.			
25	Quadrupode cane	<p>Adjustable in height with ergonomic handles.  In aluminum (ensure light weight).  Adult size: 70 to 90 cm. Child size: 50 to 70 cm.  If possible, rubber tips with metal inlay for greater resistance</p>			
26	Cane simple (Walking stick)	<p>Size: 80 to 105 cm.  Light (Aluminum).  Height adjustable with ergonomic handle.  If possible, rubber tips with metal inlay for greater resistance</p>			
27	Cane Tripode	<p>Cane with 3 legs.  Height-adjustable with ergonomic handles.  In aluminum (to ensure light weight).  Adult size: 70 to 90 cm. Child size: 50 to 70 cm.  If possible, rubber tips with metal inlay for greater resistance.</p>			
28	Cane White	<p>Must be white as it is a means of identification.  Wrist strap attached to the handle.  Straight or curved handle.  Possibly foldable.  Size: 80 to 160 cm.  Rotating rubber or nylon tip.</p>			
29	Commode Wheelchair	<p>WC with Toilet bucket  Foot rest adjustable  Removable arm rest</p>	40 Cm		
30	Commode Wheelchair	<p>WC with Toilet bucket  Foot rest adjustable  Removable arm rest</p>	45 Cm		
31	Commode Wheelchair	<p>WC with Toilet bucket  Foot rest adjustable  Removable arm rest</p>	50 Cm		
32	Commode Wheelchair	<p>WC with Toilet bucket  Foot rest adjustable  Removable arm rest</p>	55 Cm		
33	Commode Wheelchair	<p>WC with Toilet bucket  Foot rest adjustable  Removable arm rest</p>	60 Cm		
34	CP Wheelchair	<p>With head rest  With dome on the seat  Foot rest adjustable  With removable table in front( preferable)</p>	Child		
35	Elbow crutches	<p>Possibility of adjustable forearm ( especially for children)  Adjustable height</p>	Adult		
36	Elbow crutches	<p>Possibility of adjustable forearm ( especially for children)  Adjustable height</p>	child		
37	Elbow crutches	Articulated	Adult		
38	Hospital Wheelchair with toolkits	<p>With high back  Adjustable foot rest</p>	35cm		
39	Hospital Wheelchair with toolkits	<p>With high back  Adjustable foot rest</p>	40cm		

40	Hospital Wheelchair with toolkits	With high back Adjustable foot rest	45cm		
41	Hospital Wheelchair with toolkits	With high back Adjustable foot rest	50cm		
42	Hospital Wheelchair with toolkits	With high back Adjustable foot rest	55cm		
43	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	35cm		
44	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	40cm		
45	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	45cm		
46	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	50cm		
47	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	55cm		
48	Regular Wheelchair with toolkits	Foldable Removable arm rest Foot rest adjustable	60cm		
49	Regular Aluminium Wheelchair 35cm		35cm		
50	Regular Aluminium Wheelchair 40cm				
51	Regular Aluminium Wheelchair 45cm				
52	Stroller for CP Child 3/4/Year				
53	Walking Frame	Without wheels With 4 point base Height adjustable Two ergonomic handles Foldable With rubber tips with metal inlay for greater resistance.	Adult		
54	Walking Frame	Without Wheels	Child		
55	Walking Frame	4 WHEELS, with breaks	Adult		
56	Walking Frame	With Wheels With 4-point base. Height adjustable Two ergonomic handles. Two small front caster wheels. on the 2 frontal supports of the frame	Child		
57	Walking Frame	With Wheels With 4-point base. Height adjustable Two ergonomic handles. Two small front caster wheels. Foldable. Two small front caster wheels on the 2 frontal supports of the frame.	Adult		
58	AFO	Right Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Large		
59	AFO	LEFT Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Small		
60	AFO	RIGHT Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Small		
61	AFO	Right Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Medium		
62	AFO	Left Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Large		
63	AFO	Left Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.	Medium		

64	AFO	<p style="text-align: center;">Right</p> <p>Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.</p>	Xlarge		
65	AFO	<p style="text-align: center;">Left</p> <p>Prefabricated plastic caliper / holder in polypropylene that fits around the back of the Ankle joint and hold it in a 90° position (open orthosis). 2 Velcro straps: 1 around the shin and 1 across the front of the ankle.</p>	Xlarge		
66	Arm sling	<p>Prefabricated arm sling in light, washable fabric (canvas). Reversible to fit right or left arm. Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the arm piece is worn around the neck to support the forearm. Velcro fasteners. If possible, choose an adjustable strap. To size, measure chest size and cuff length.</p>	Small		
67	Arm sling	<p>Prefabricated arm sling in light, washable fabric (canvas). Reversible to fit right or left arm. Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the arm piece is worn around the neck to support the forearm. Velcro fasteners. If possible, choose an adjustable strap. To size, measure chest size and cuff length.</p>	Medium		
68	Arm sling	<p>Prefabricated arm sling in light, washable fabric (canvas). Reversible to fit right or left arm. Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the arm piece is worn around the neck to support the forearm. Velcro fasteners. If possible, choose an adjustable strap. To size, measure chest size and cuff length.</p>	Large		
69	Arm sling	<p>Prefabricated arm sling in light, washable fabric (canvas). Reversible to fit right or left arm. Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the arm piece is worn around the neck to support the forearm. Velcro fasteners. If possible, choose an adjustable strap. To size, measure chest size and cuff length.</p>	X-large		
70	Cervical collar	<p style="text-align: center;">Soft</p> <p>Neck collar for neck pain/ Soft / different sizes</p>	Small		
71	Cervical collar	<p style="text-align: center;">Soft</p> <p>Neck collar for neck pain/ Soft / different sizes</p>	Medium		
72	Cervical collar	<p style="text-align: center;">Soft</p> <p>Neck collar for neck pain/ Soft / different sizes</p>	Large		
73	Cervical collar	<p style="text-align: center;">Soft</p> <p>Neck collar for neck pain/ Soft / different sizes</p>	X-large		
74	Cervical collar	<p style="text-align: center;">Hard, with chin support</p>	Small		
75	Cervical collar	<p style="text-align: center;">Hard, with chin support</p>	Medium		
76	Cervical collar	<p style="text-align: center;">Hard, with chin support</p>	Large		
77	Cervical collar	<p style="text-align: center;">Hard, with chin support</p>	X-large		
78	Hip Abduction Splint / Brace	<p style="text-align: center;">For infants from 0-18months</p>	Medium		
79	Hip Adduction Splint / Brace	<p style="text-align: center;">Adjustable For infants from 0-6months</p>	small		
80	Hip Adduction Splint / Brace	<p style="text-align: center;">Adjustable For infants from 7-12months</p>	Medium		
81	Hip Adduction Splint / Brace	<p style="text-align: center;">Adjustable For infants from 13-18months</p>	Large		
82	Hyperextension Brace	<p style="text-align: center;">Different sizes, Adjustable</p>	Large		
83	Knee brace Dynamic	<p style="text-align: center;">Different sizes, With articulation</p>			
84	Knee brace Dynamic	<p style="text-align: center;">With Articulation</p>	Small		
85	Knee brace Dynamic	<p style="text-align: center;">With Articulation</p>	Medium		
86	Knee brace Dynamic	<p style="text-align: center;">With Articulation</p>	Large		
87	Knee brace Dynamic	<p style="text-align: center;">With Articulation</p>	X-large		
88	Knee immobilizer	<p style="text-align: center;">Different sizes, Static /Zimmer</p>	Small		
89	Knee immobilizer	<p style="text-align: center;">Different sizes, Static /Zimmer</p>	Medium		

90	Knee immobilizer	Different sizes, Static /Zimmer	Large		
91	Knee immobilizer	Different sizes, Static /Zimmer	X-large		
92	Knee splint with open patella	Different sizes, Elastic	Small		
93	Knee splint with open patella	Different sizes, Elastic	Medium		
94	Knee splint with open patella	Different sizes, Elastic	Large		
95	Knee splint with open patella	Different sizes, Elastic	X-large		
96	Knee splint with open patella	Different sizes, Elastic	XX-large		
97	Lumbar belt	With support	Small		
98	Lumbar belt	With support	Medium		
99	Lumbar belt	With support	Large		
100	Lumbar belt	With support	X-large		
101	Lumbar belt	With support	XX-large		
102	Regular hand splint	Right Regular orthosis to support hand and wrist	Small		
103	Regular hand splint	Right Regular orthosis to support hand and wrist	Medium		
104	Regular hand splint	Right Regular orthosis to support hand and wrist	Large		
105	Regular hand splint	Left Regular orthosis to support hand and wrist	Small		
106	Regular hand splint	Left Regular orthosis to support hand and wrist	Medium		
107	Regular hand splint	Left Regular orthosis to support hand and wrist	Large		
108	Regular wrist splint	Right Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Small		
109	Regular wrist splint	Right Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Medium		
110	Regular wrist splint	Right Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Large		
111	Regular wrist splint	Left Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Small		
112	Regular wrist splint	Left Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Medium		
113	Regular wrist splint	Left Wrist orthosis that fits wrist and thumb. With aluminum anterior plate to maintain 45° extension of wrist. Velcro straps on posterior. Soft, resistant and washable material.	Large		

114	Shoulder sling	Prefabricated articulated arm sling in light, washable fabric (canvas). Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the sling immobilizes the shoulder. Velcro fasteners. If possible, choose an adjustable strap.	Small		
115	Shoulder sling	Prefabricated articulated arm sling in light, washable fabric (canvas). Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the sling immobilizes the shoulder. Velcro fasteners. If possible, choose an adjustable strap.	Medium		
116	Shoulder sling	Prefabricated articulated arm sling in light, washable fabric (canvas). Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the sling immobilizes the shoulder. Velcro fasteners. If possible, choose an adjustable strap.	Large		
117	Shoulder sling	Prefabricated articulated arm sling in light, washable fabric (canvas). Sling needs to support a forearm in a plaster cast, if necessary. A strap attached to the sling immobilizes the shoulder. Velcro fasteners. If possible, choose an adjustable strap.	X-large		
118	Thoraco Lumbar Belt	Dorso lumbar support	Medium		
119	Thoraco Lumbar Belt	Dorso lumbar support	Large		
120	Thoraco Lumbar Belt	Dorso lumbar support	X-Large		
121	Bed Sheet-plastic				
122	Rubber stick		For Axillary		
123	Rubber stick		for Elbow		
124	Rubber stick		For Walker		
125	Rubber stick		For Tripod / Quadripode		
126	Anti-Bedsore Air Mattresses	electric			
127	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	35cm		
128	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	40cm		
129	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	45cm		
130	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	50cm		
131	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	55cm		
132	Anti-pressure cushion gel foam	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	60cm		
133	Anti-pressure sore foam cushion	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	35 Cm		
134	Anti-pressure sore foam cushion	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	40 Cm		
135	Anti-pressure sore foam cushion	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	45 Cm		
136	Anti-pressure sore foam cushion	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	50 Cm		
137	Anti-pressure sore foam cushion	Pillow for wheelchair /Pressure sore prevention /Gel and foam/ With removable cover	55 Cm		
138	Bed Pan	Bedpan with ergonomic seat form. Plastic or metal. Available with lid. With inside ledges for easier installation and soft rim to prevent injuries.			
139	CP positioning chair	corner seat or normal seat with dome, head rest and belts Extra specifications( attached table, foot rest)	Child( S, M, L)		

140	Elastic bandage	Elastic bandages providing support and compression. Roll of maximum 1.5 m in length. A fastener to hold the bandage in place. Washable.	10 cm		
141	Elastic bandage	Elastic bandages providing support and compression. Roll of maximum 1.5 m in length. A fastener to hold the bandage in place. Washable.	15 cm		
142	Hot bag	For warming Use / Filled with Hot Water.			
143	Mirror	Round Small with Handle / to observe hidden body areas.			
144	Pump for wheelchair	easily to be used			
145	Push-up blocks	Ergonomic, non-slip support handle for floor exercises.			
146	Re-Education Ball	Ball in soft, non-slip PVC material. Sizes (diameter between 30 and 50 cm) - weight between 1 to 3 kg. Different colors.			
147	Soft Ball	Density for exercise level: Soft/Light Foam or gel softball. Diameter: between 7 and 10 cm.	Pink		
148	Soft Ball	Density for exercise level: Medium Foam or gel softball. Diameter: between 7 and 10 cm.	Blue		
149	Soft Ball	Density for exercise level: Hard Foam or gel softball. Diameter: between 7 and 10 cm.	Orange		
150	Theraband	Light	Green		
151	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	BLUE		
152	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	Red		
153	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	Gold		
154	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	Yellow		
155	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	Black		
156	Theraband	Silicone-coated elastic bands. Minimum sizes: Length = 150 cm to 200 cm and width = 12 cm to 20 cm. Type of extensibility: strong - medium - low. Roll of 3 to 5 m. The most common trade name for this product is THERABAND.	Gray		
157	Toilet chair + Bucket	With wheels and brakes Foldable movable toileting seat and a toilet - Backrest in plastic of average height, stable armrests (can be removable for easier transfer). The components of the chair should be light-weight (easy to transport) and washable (ensure hygiene). Seat height adjustable between 40 and 55 cm. Seat width: average of 42 cm. Seat depth: average of 50 cm. In aluminum Sizes : Adult			

158	Toilet chair + Bucket or commode chair	With wheels and brakes Foldable movable toileting seat and a toilet - Backrest in plastic of average height, stable armrests (can be removable for easier transfer). The components of the chair should be light-weight (easy to transport) and washable (ensure hygiene). Seat height adjustable between 40 and 55 cm. Seat width: average of 42 cm. Seat depth: average of 50 cm. In aluminum Sizes : Adult			
159	Toilet chair- Child	Foldable chair if possible. With removable toileting seat and a toilet bowl. Backrest in plastic of average height, stable armrests (can be removable for easier transfer). The components of the chair should be light-weight (easy to transport) and washable	child		
160	Transfer board	Made with strong plastic or wood. If wood, the transfer board should be sanded and Varnished. Light. Straight or curve: Length: 70 cm width: 21 to 23 cm, thickness: 15 mm. If possible: with cut-out handles for gripping.			
161	Urinal flask	1L urinal flask. Plastic (usually white plastic). If possible, with handle for easy use.			
162	Anti-pressure sore water mattress	Water With Velcro attach Made of soft material to prevent harm to the patient			
163	Wheelchair belt	Wide			
164	Universal Adaptive Cuff Utensil holder				
165	Foam tubing for utensils with S-M-L diameters				
166	Hand grip Reacher				
167	Toilet seat raiser with removable arms				
168	Sock /shoes wearing aid
