

Technical Trainer

Short Vocational Trainings

Lebanon

CONTEXT

The European Institute for Cooperation and Development (IECD) is a French non-governmental organization (NGO) founded in 1988 and operating in the field of social and economic development in partnership with local institutions. IECD's main sectors of action are vocational training and professional integration, assistance to micro and small enterprises, and access to education for the most vulnerable. IECD has been operating in Lebanon since 1989 and opened a regional office in Beirut in 2007.

Semeurs d'Avenir (SDA), association created in 2010, is the operational partner of IECD in Lebanon. As part of its partnership with IECD, SDA implements projects in entrepreneurship, education, training, and professional integration.

The short trainings intervention aims to bring professional skills to young Lebanese and refugees through short-term (up to 4 months) vocational training programs targeting jobs with higher employment opportunities on the local labour market. Nine training programs are currently being offered: installation of solar panels, hospitality, plumbing, electricity, heating and air conditioning, sewing, childcare, patient and elderly care, and nail and foot care. These training programs are combined with a personal development component, which includes community activities and general improvement of personal skills.

To support this project, IECD and SDA are searching for a technical trainer in electricity and installation of solar panels to facilitate trainings in Bierut Mount Lebanon. The electricity training is 240-hours and the installation of solar panel training is 60 hours, divided into 5 days (3 to 4 hours per day) for about three months for electricity and one month for installation of solar panels.

This project targets beneficiaries from vulnerable backgrounds, with ages varying from 15 to 35. Most of the trainings don't require a pre-requisite from the trainee since they are entry level programs.

SCOPE OF WORK

The Trainer is expected to perform the following tasks:

- Participate in the Training of Trainers (TOT) which involves selecting the candidates who actively participate in the TOT and prepare and deliver a successful demo lesson.
- Prepare lessons based on the Electricity curriculum as per the competency-based approach.
- Deliver lessons in a trainee-centered manner while deploying interactive training strategies.
- Prepare and conduct several formative assessments tasks and a summative one.
- Grade the assessment tasks.
- Collaborate with the Senior Training Coordinator or Training Coordinator when handing-in lesson plans and grades.
- Collaborate with the Senior Training Coordinator or Training Coordinator about the material needed for the training program.
- Monitor the trainees' performance during internships when needed.
- Fill in some administrative forms as required.
- Participate in the capacity-building workshops at SDA/IECD.

TIME FRAME OF ASSIGNMENT

- The trainer will deliver several courses per year based on the need, and this is related to their performance evaluation during and after the first training takes place.

PROFILE

Education

- University graduate and /or technical school graduate in (Electricity).

Experience

- At least 3 years of professional experience in the work sector.
- Experience in vocational training.
- Experience in the competency-based approach is an advantage.

Recommended attributes:

- Fluency in Arabic. English and French are a plus.
- Oral and written communication skills.
- Organizational skills.
- Ethical and professional integrity.
- Empathetic and non-judgmental personality.
